

SSO Epic Integration with SMARTonFHIR

Updated: February 2026

Advancing human progress together

Recommended Resources

- Epic ECSA
- Epic TS
- Epic Analyst

ClinicalKey AI User-based Access

- CK AI access via SAML or Username/Password (U/P) is required to set up EHR SSO integration
 - *This is a separate implementation, not covered in this document*
- Email address or UPN associated with CK AI users' SAML or U/P profiles must be present in the Epic user profiles
 - *This ensures linking of authentication methods and personalization features and will be determined during initial access set up*

FHIR Connection Setup

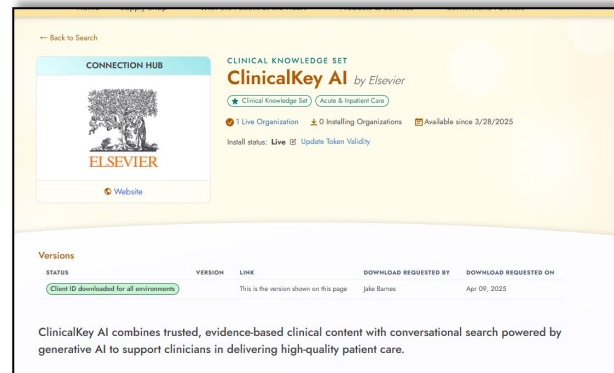

- Interconnect needs to be set up to allow the application to access data in Epic
- For more information on these topics, see the [Interconnect Setup and Support Guide](#) or reach out to your Client Systems Web and Service Servers TS
- Share your endpoints with Elsevier for integration with your system
 - Your “2501-FHIR-Patient Facing” and “2502-FHIR-Provider Facing” URL types, as described in the [Care Everywhere Setup](#) topic

Allow Content

- Network Allowlist- If your organization uses a network level domain allowlist, work with your ECSA (if your organization is Epic-hosted) or security administrators (if your organization is self-hosted) to be sure the following domain is added
- Epic Browser Allowlist- Follow the steps in the [Browser Allowlist Setup and Support Guide](#) to enable the following domains
- ai.clinicalkey.com

Application Build

1. Request ClinicalKey AI from the Epic App Showroom
<https://showroom.epic.com/Listing?id=2623&returnTitle=3>
2. App request will be reviewed/approved by Elsevier

Application Build

Configure Web Application FDI record with the following values:

Non-Prod	
Integration Type	SMART on FHIR
URL	https://access.healthcare.elsevier.com/realms/h/sof-broker/epic-nonprod/launch?client_id=clinicalkey-ai
Client ID	e02b21c4-4c4f-41ea-9709-8ef0ac8c31ca
Launch Type (option 1)	1- <u>External Window</u> - CK AI will open in an external browser window - It may be necessary to update the 'Launch type override' setting in browser allowlist for the URL to 'New Hyperdrive Window'
Launch Type (option2)	0- <u>Workspace</u> - CK AI will open in the Epic chart sidebar view - When using this launch type, the Form Style parameter in the Activity build should be 2097152 - ED_FORM_STYLE_SIDEBAR
Authentication Method	SMART on FHIR

Production	
Integration Type	SMART on FHIR
URL	https://access.healthcare.elsevier.com/realms/h/sof-broker/epic/launch?client_id=clinicalkey-ai
Client ID	6a7d1849-6c1d-4203-9966-1694db4894e5
Launch Type (option 1)	1- <u>External Window</u> - CK AI will open in an external browser window - It may be necessary to update the 'Launch type override' setting in browser allowlist for the URL to 'New Hyperdrive Window'
Launch Type (option2)	0- <u>Workspace</u> - CK AI will open in the Epic chart sidebar view - When using this launch type, the Form Style parameter in the Activity build should be 2097152 - ED_FORM_STYLE_SIDEBAR
Authentication Method	SMART on FHIR

Configure Menu Item(s) linking to the FDI record, based on desire link location(s)
